

Electronic Signature Pads

*What Makes
Wacom Different?*

Wacom's signature pads are an ideal solution for high traffic areas like counters, teller desks and any area where space is at a premium.

In addition to providing a variety of unique benefits, Wacom signature pads come equipped with our patented Electromagnetic Resonance (EMR) sensor technology, a wireless battery-free pen, and WILL™ (Wacom Ink Layer Language) which captures natural looking signatures on screen.

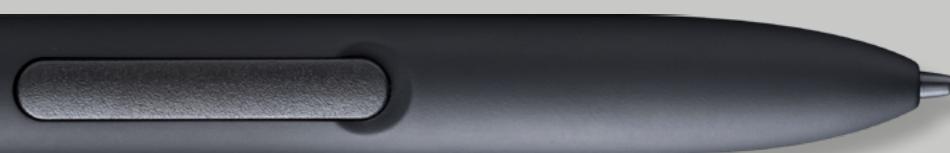

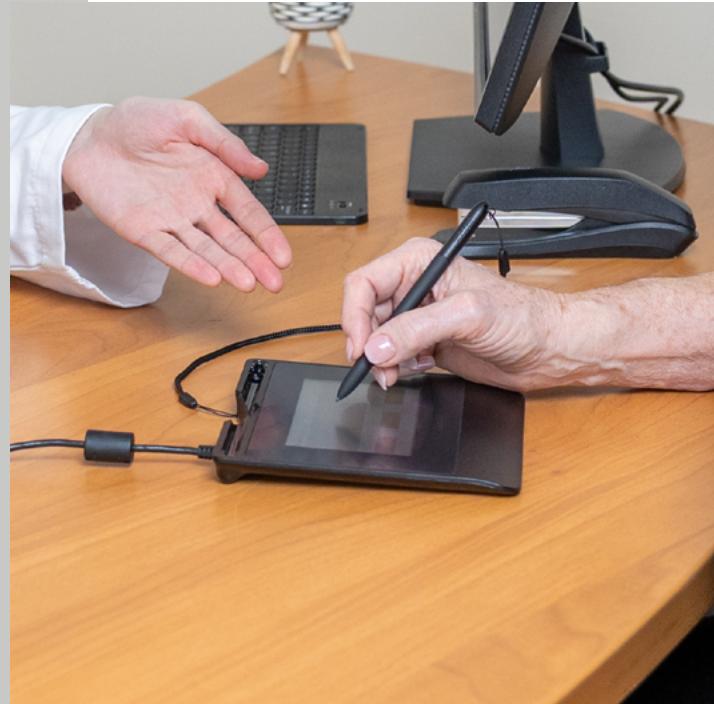

Durability

The Wacom Difference

Employees should be able to focus on strategic objectives, not purchasing or replacing new technology solutions. A durable electronic signature solution is a critical component of any successful business.

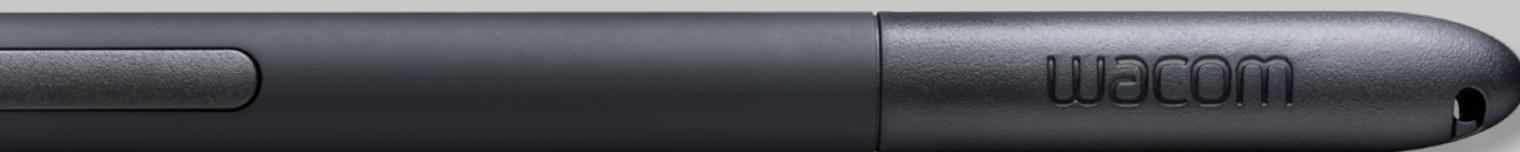

FEATURE	WACOM FOR BUSINESS	COMPETITOR PRODUCTS
Anti-glare, scratch-resistant tempered-glass screen	✓	✗
Pen sensor technology embedded under the display	✓	✗
3-year Warranty, 5-year Extended Warranty	✓	✗
Battery-free, cable-free pen reduces the need for IT to replace parts	✓	✗

Signature Capture Quality *The Wacom Difference*

A signature is a legally binding contract between two parties. Ensuring the highest possible signature capture accuracy reduces the risk of error for high-quality verification.

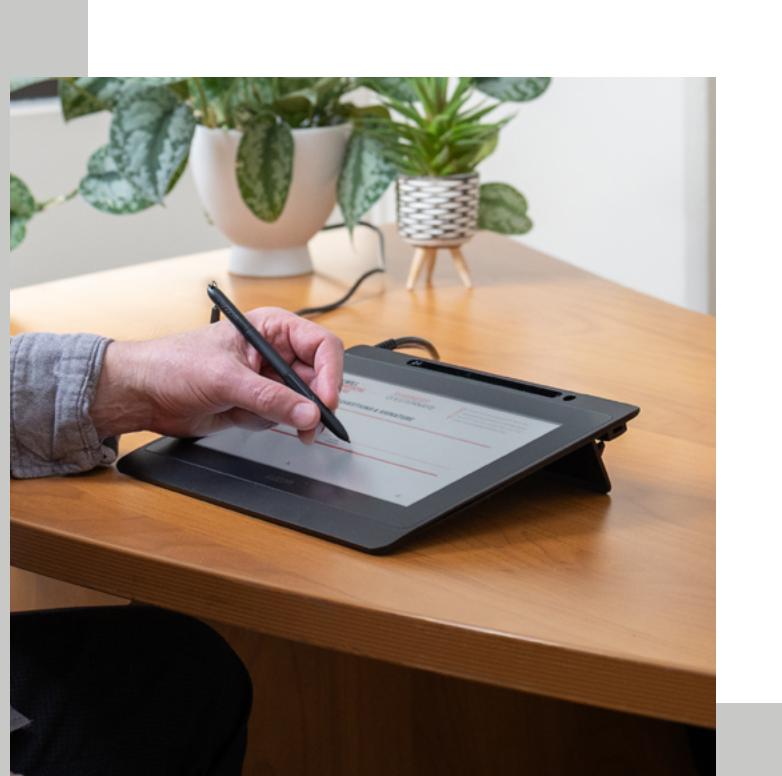

FEATURE	WACOM FOR BUSINESS	COMPETITOR PRODUCTS
SDK integration captures biometric signature data which can be stored and compared for verification	✓	✗
The pen-tip material is carefully selected to match each writing surface	✓	✗
Precision - WILL™ captures a lifelike signature that looks just like your pen-on-paper signature	✓	✗
Optimized signature pad design reliably captures signatures over many years without lowering the signature quality	✓	✗

Efficiency *The Wacom Difference*

Technology should never get in the way of important in-person interactions, it should enhance our efforts. Effective electronic signature pads are easily integrated into daily workflows for maximum efficiency.

FEATURE	WACOM FOR BUSINESS	COMPETITOR PRODUCTS
Display functionality allows you to show rotating marketing messages when not in signing mode	✓	✗
Thinner profile and lighter weight for greater mobility	✓	✗
Eliminate printing, scanning and archiving paper records	✓	✓
Supports VCP and thin client environments for simplified IT infrastructure	✓	✓

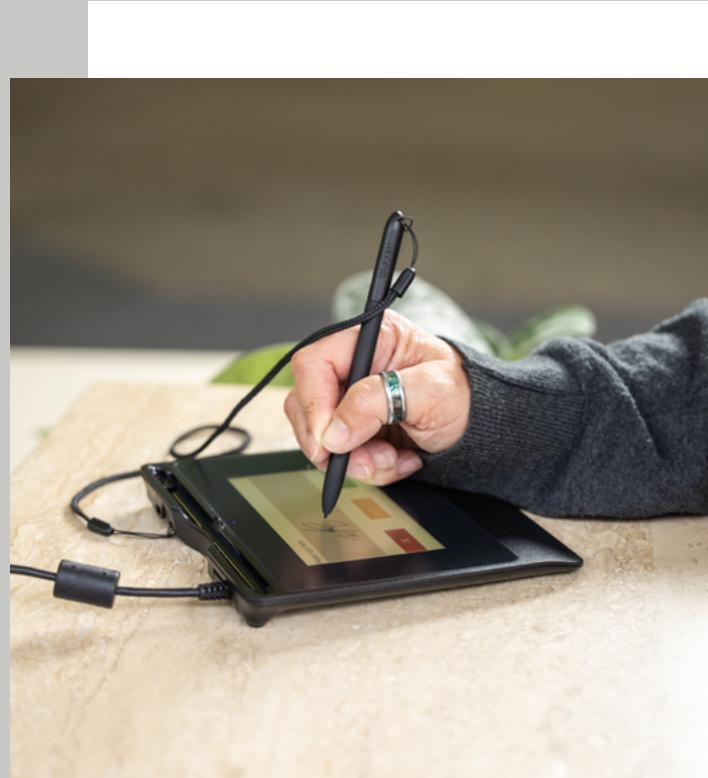

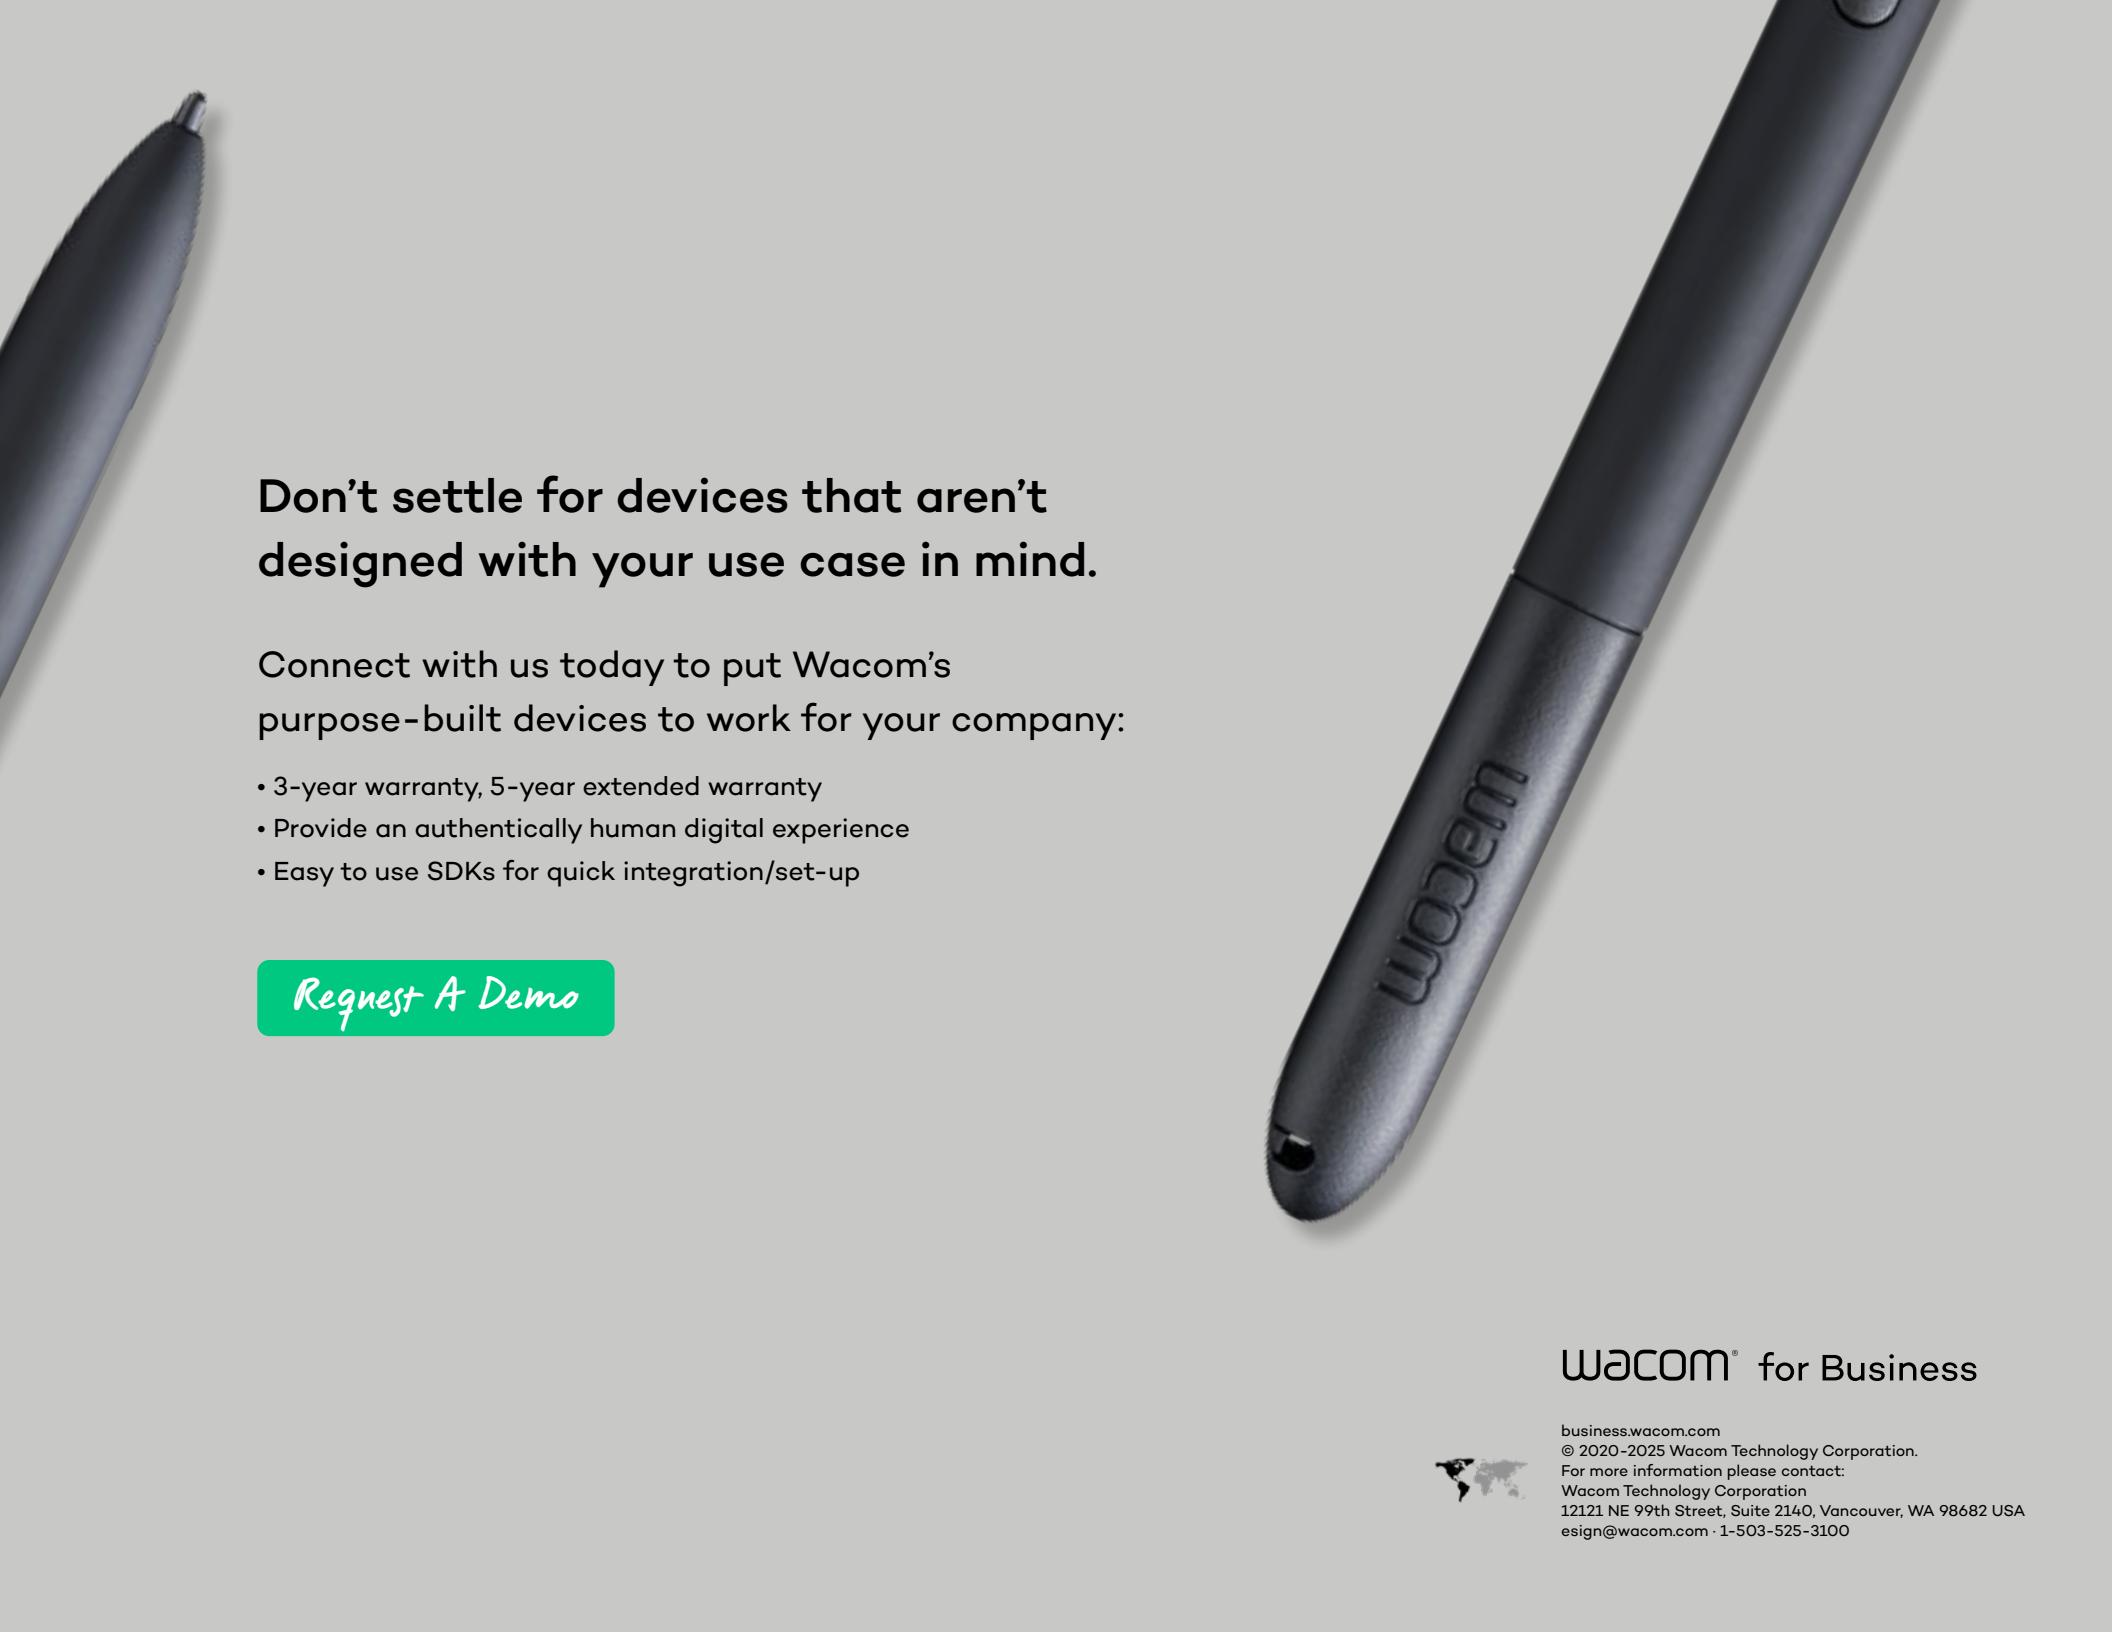

Security

The Wacom Difference

Protect documents and data throughout complex, multi-stage transactions while impressing customers with modern user experiences with electronic signature solutions.

FEATURE	WACOM FOR BUSINESS	COMPETITOR PRODUCTS
End-to-end AES 256 / RSA 2048 encryption	✓	✗
No local storage	✓	✓
Supports the use of multi-factor authentication including signature verification	✓	✗
Avoids the use of WiFi or Bluetooth where data could be intercepted	✓	✓

**Don't settle for devices that aren't
designed with your use case in mind.**

Connect with us today to put Wacom's
purpose-built devices to work for your company:

- 3-year warranty, 5-year extended warranty
- Provide an authentically human digital experience
- Easy to use SDKs for quick integration/set-up
